

### Topics for Submission

Fluorine - Basic Chemistry/Applications  
Bromine - Basic Chemistry/Applications  
Iodine - Basic Chemistry/Applications  
Iodine – Commercial Considerations  
Astatine - Basic Chemistry/Applications  
Radiohalogen Production  
Peptide/Protein Labeling  
Auger Therapy  
Biomolecules  
Gene Therapy/Aptamers  
Neurotransmission  
Clinical Evaluation/Implications for Imaging

### Deadlines

Abstract Submission—June 1, 2008  
Early Registration—July 1, 2008

### Purpose and Scope

The purpose of the meeting is to provide a scientific forum for presentations and discussion of topics related to all aspects of radiohalogen research. Topics to be included are production, radiolabelling chemistry, and applications such as imaging and therapy. Implications of using radiohalogens, such as  $^{124}\text{I}$  and  $^{76}\text{Br}$  in imaging will be discussed. The meeting is intended to be small (<100 attendees) with both oral and poster presentations, as well as educational workshops with adequate discussion time.

### Location and Accommodations

The symposium will be held in beautiful Whistler B.C., Canada (Venue for the 2010 Winter Olympics). Whistler is a scenic two-hour drive from Vancouver International Airport via the Sea to Sky Highway, and is also accessible by bus, taxi/limousine. Accommodations will be at the Hilton Whistler Resort and Spa, located in the heart of the village, within walking distance to all amenities. The meeting rooms will be at the Telus Whistler Conference Centre just steps away from the hotel.

### Invited Speakers

John Babich  
Mark Goodman  
George Kabalka  
Amin Kassis  
Jason Lewis  
Robert Mairs  
Gilles Tmagnam  
Jamey Weichert  
Michael Welch  
Len Wiebe  
Frank Wuest  
Michael Zalutsky
